

## Why MD Anderson

### MD Anderson's Breast Cancer Moon Shot® Program

MD Anderson's Breast Cancer Moon Shot initiative is focused on newly diagnosed triple-negative breast cancer (TNBC) and partners with local oncologists to provide optimal, individualized patient care. Patients with early-stage TNBC now have targeted therapy options based on the histologic and genomic profile of their individual tumor. To learn more about our Moon Shot Program, visit [cancermoonshots.org/breast](http://cancermoonshots.org/breast).

### Cancer cannot wait.

At MD Anderson, we understand that early detection of breast cancer leads to better treatment results. Schedule your patient for a breast screening mammogram at one of our four [breast diagnostic imaging](#) clinics.

Real-time results are made available to patients **at the time of their appointment** for all breast screening and diagnostic examinations.

**Annual breast screening mammograms are recommended at age 40.**

To learn more about higher-risk screening guidelines, visit our [Clinical Practice Algorithms](#) page.

### When physicians partner, patient's choice expands.

If your patient has an increased risk of breast cancer due to family history, discovers a breast cancer risk symptom, or is a breast cancer survivor, we have multiple clinics available. These clinics provide high-touch nurse navigators to guide patients through personalized treatment options, so they have a clear understanding of next steps.

### High Risk Breast Screening and Genetics Clinic

- Advanced imaging techniques tailored to risk profile
- Chemoprevention
- Genetic risk evaluation
- Lobular carcinoma in situ (LCIS) or atypical hyperplasia

### Undiagnosed Breast Clinic

- Abnormal mammogram, ultrasound or other breast imaging tests
- Second opinion for high-risk features on breast biopsy
- Symptoms, including a breast lump, nipple discharge, breast swelling, redness, or scaling of the nipple

### Advanced Breast Cancer Clinic

- Inflammatory breast cancer
- Metastatic (stage IV) breast cancer
- Clinical trial screening, including evaluation and counseling for investigational therapy opportunities with genetic sequencing of the tumor
- Health care services, including integrative medicine, lymphedema therapy, occupational and physical therapy, psychological care and more

### Breast Cancer Survivorship Clinic

- Provides regular physical exams, manages cancer and treatment-related side effects, and can provide referrals to resources and support groups

## Connect with us

### A safer environment

Keeping our patients and workforce safe has always been our top priority. We continue to proactively implement measures to ensure the safety of patients on all our campuses. To learn more about our response to COVID-19, visit our [Coronavirus Precautions page](#).

### Breast care team

For information about our breast cancer faculty, visit our [directory](#).

### Cancer center locations

When you refer to MD Anderson, your patients will receive the highest level of care in a safe, compassionate environment. We provide breast cancer services at multiple locations across Houston, making it easy and convenient for your patients, including:

- Nellie B. Connally Breast Center (Texas Medical Center)
- MD Anderson League City
- MD Anderson in Memorial City
- MD Anderson in Sugar Land
- MD Anderson The Woodlands
- MD Anderson West Houston

Learn more about each of our [locations](#) and their offerings to find the most convenient one for your patient.

### Patient referrals

Our [Referring Provider Team](#) is dedicated to assisting health care providers with the following:

- Referrals to any MD Anderson center or location
- Continuous follow-up on the status of referrals
- Answers to questions about patient access procedures
- Support with our online physician portal

### Physician portal

Our secure, HIPAA-compliant portal is available for health care providers to take an active role in managing patient care at MD Anderson. After creating a [myMDAnderson](#) for Physicians account, you can:

- Access patient appointment schedules
- Access transcribed patient reports and results
- Receive notifications regarding referral status and results
- Easily update your profile and contact information

### Referring Provider Team
